Back in 2009, three friends decided to turn their favourite pieces of online writing into a newspaper that could be enjoyed away from the distraction of a screen. People loved the idea and realised how many different ways you can use a newspaper. But the industry wasn’t set up for non-traditional publishers and making a newspaper was expensive and challenging — so Newspaper Club was born!

Our very first newspaper won a Design of the Year award and sits in the permanent collection of the Design Museum in London. We love to think it’s going down in history — perhaps your newspaper will, too.

Since then, Newspaper Club has taken off in ways we couldn’t have imagined and we are the first choice for creative people printing newspapers all over the world.

Run by a close-knit, experienced team in Glasgow, Scotland, it’s still our mission to make newspaper printing easier for everyone.

We’ve been amazed and delighted by the newspapers that come off our presses. Everything from local newspapers and festival brochures to theatrical props, big brand lookbooks, portfolios and even wedding proposals! Looking to share your story in an innovative, cost-effective way? Newspaper Club is here for you.

YOU’RE IN PRINT!

Read the fun part: reading, displaying and sharing your newspaper.
We source all of our paper stocks from sustainably managed forests.

**Good News**

We believe print can and should be a sustainable medium so we conduct our business with that goal in mind.

**Sourcing Paper**

Our papers are sourced from sustainably managed forests and producers that have met a strict set of environmental and socially responsible standards. You can read about the specific environmental certificates for each paper on the Environment page on our website.

**Renewable Energy**

The solar panels at our print warehouse generate over 100MWh of electricity per year, producing enough power to print all of our newspapers.

**Plastic Reduction**

We use minimal plastic in our packaging. We’ve trialled this with digital orders in the UK by removing plastic wrap, strapping and packing tape. We also offer compostable packhugs for mailouts.

**Sustainable Printing**

Our digitally printed newspapers use toner made from 100% certified green energy and contained in fully recyclable containers. It is free from solvents and VOCs (volatile organic compounds), odourless and food-approved. It is also de-inkable, meaning the paper can be completely recycled into fresh newprint.

Our traditionally printed newspapers use standard coldset web offset inks made by SunChemical. Currently there are no vegetable inks developed specifically for newspaper presses so these are oil-based inks, however they are VOC-free.

**Closing the Loop**

Printing newspapers can produce waste when we run tests to get the best results, but we reuse or recycle as much as possible.
